

ALTA SPECIFICATION

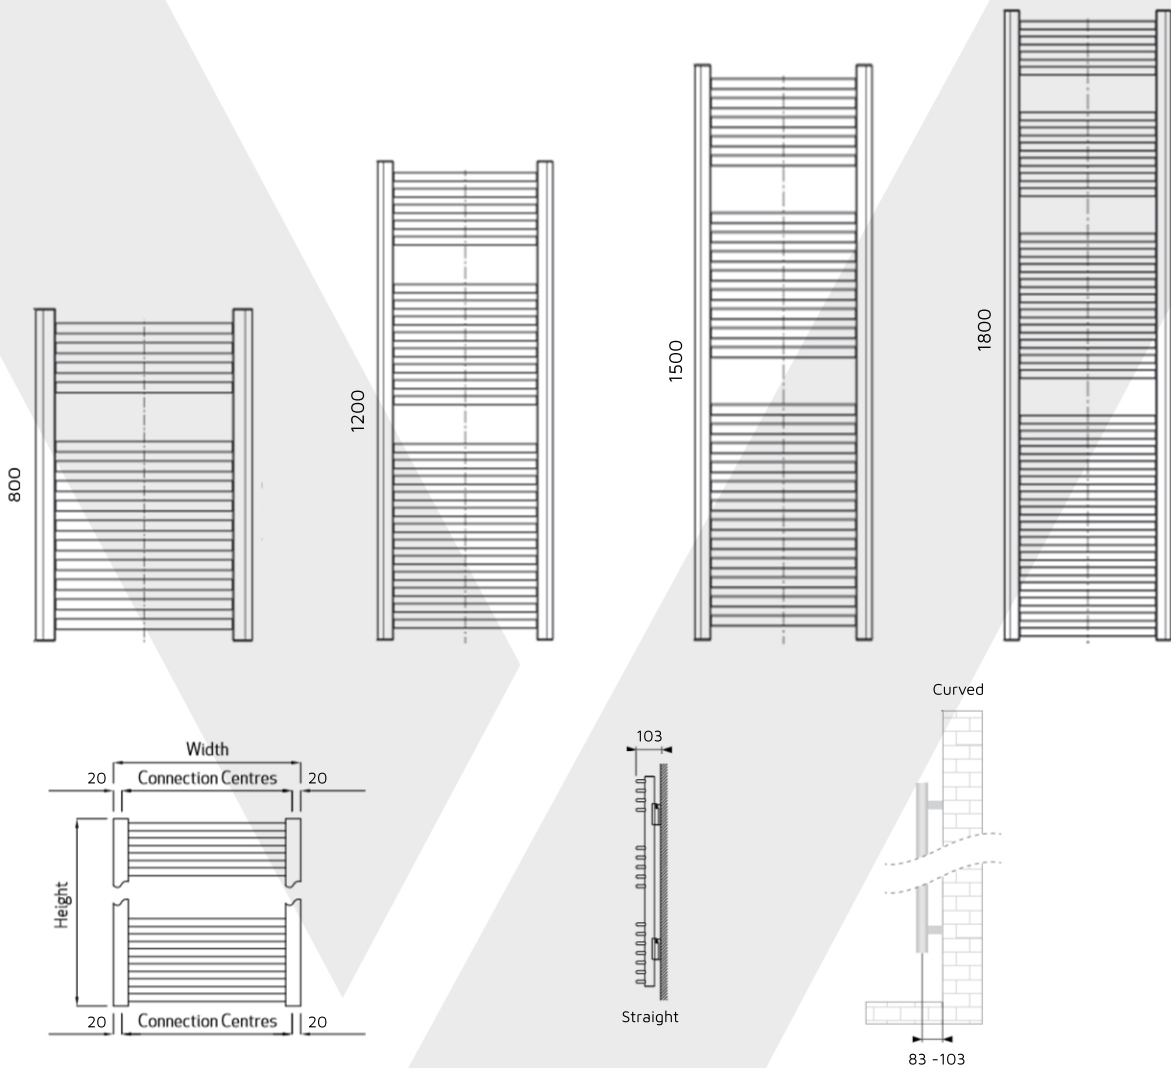

*Note: The distance between the connection centres equals the length of the radiator

22mm Straight

Radiator Height (mm)	800-1800
Water Content Per Element/Tube (L)	2.94-8.41

25mm Straight & Curved

Radiator Height (mm)	800-1800
Water Content Per Element/Tube (L)	4.3-9.8

If used with Vaporo Valves.

Please note due to manufacturing tolerances pipe centres may vary by +/- 10mm, we recommend that pipe work is not altered until your radiator is on site.

All Alta Radiators: Test Pressure: 6.5 bar Max Operating Pressure: 5 Bar
